
Pyramid Algorithms A Dynamic Programming Approach To Curves And Surfaces For Geometric Modeling The Morgan Kaufmann Series In Computer Graphics

pyramid algorithms for bernstein-bezier finite elements of ... - pyramid algorithms for bernstein-bezier finite elements of high, non-uniform order in any dimension mark ainsworth abstract. the archetypal pyramid algorithm is the de casteljau algorithm, which is a standard tool for the evaluation of bezier curves and surfaces. **pyramid algorithms for barycentric rational interpolation** - pyramid algorithms for barycentric rational interpolation kai hormann scott schaefer abstract we present a new perspective on the floater-hormann interpolant. this interpolant is rational of degree $(n;d)$, reproduces polynomials of degree d , and has no real poles. by casting the **convergence of fuzzy-pyramid algorithms** - dr. j.k. aggarwal - to other clustering algorithms make it an attractive choice for clustering data. the convergence properties of the hard-pyramid algorithms are presented in [20], but no equivalent proof of the convergence of fuzzy-pyramid algorithms exists. here, we fill this gap and present a **pyramid algorithms for barycentric rational interpolation** - pyramid algorithms for barycentric rational interpolation kai hormann scott schaefer abstract we present a new perspective on the floater-hormann interpolant. this interpolant is rational of degree (n,d) , reproduces polynomials of degree d , and has no real poles. by casting the evaluation of this interpolant as a pyramid algorithm, we first **parallel algorithms for regular architectures : meshes and ...** - 5 tree-like pyramid algorithms 213 5.1 introduction 213 5.2 definitions 214 5.3 lower bounds 214 5.4 fundamental algorithms 216 5.5 image algorithms 222 5.6 further remarks 239 6 hybrid pyramid algorithms 241 6.1 introduction 241 6.2 graphs as unordered edges 243 6.3 graphs as adjacency matrices 250 6.4 digitized pictures 253 6.5 convexity 261 **mesh and pyramid algorithms for iconic indexing** - mesh and pyramid algorithms for iconic indexing alok chouhary and sanjay ranka school of computer and information science 4-116 cst syracuse university syracuse, ny 13244-4100 april 9, 1991 abstract in this paper parallel algorithms on meshes and pyramids for iconic indexing are presented. our algorithms **image shrinking and expanding on a pyramid*** - cise.ufl - image shrinking and expanding on a pyramid* jing-fu jenq and sartaj sahani university of minnesota university of florida abstract we develop two algorithms to perform the q step shrinking and expanding of an $n \times n$ binary image on a pyramid computer with an $n \times n$ base. the time complexity of both algorithms is $o(\sqrt{q})$. **mesh and pyramid algorithms for iconic indexing** - mesh and pyramid architectures. we present algorithms for type-2, type-i, and type-o matching problems (as defined in [4] and section 4). furthermore, we introduce another matching problem (called type-3) and present algorithms for it. given a symbolic picture f (dimension $n \times n$) and a symbolic pattern p (dimension $m \times m$), the proposed algorithms **pyramid methods in image processing** - persci.mit - pyramid methods in image processing the image pyramid offers a flexible, convenient multiresolution format that mirrors the multiple scales of processing in the human visual system. digital image processing is being used in many domains today. in image enhancement, for example, a variety of methods now exist for removing image degradation **solving the pyramix** - brandeis - directions for solving the pyramix (pyramid) these instructions can be used to solve the pyramix (or pyramid) starting from any combination of colors on a mixed up pyramix. the pyramix, inspired by rubik's cube, is a four-sided tetrahedron (pyramid) puzzle. the instructions are both easy to follow and easy to memorize. **comments on Ômesh and pyramid algorithms for iconic ...** - for the algorithms described in our paper, broadcasting from the controller to processing elements in unit time is not a requirement for the pyramid architecture. pipelining can be used to broadcast a sequence of values from the apex such that a pattern value reaches every processor after unit time gaps after an initial delay equal to the **laplacian image pyramids and their applications** - 3 laplacian pyramid algorithm---image pyramids • gaussian • laplacian • wavelet/qmf • steerable pyramid what is a good representation for image analysis? (goldilocks and the three representations)
